Summary

Hello, I am a first-year part-time student at AGH University of Science and Technology in Cracow, majoring in computer science and econometrics. It is a completely different direction than the one I took when choosing high school, because I was only introduced to the IT world during my studies secondary school. I am currently creating websites using HTML/CSS + JS. At work I strive for constant self-development and expanding my professional competences. If you are looking for a junior with great prospects and great commitment, you have come to the right place.

My website: Lukasdev.eu

Work Experience

Helpdesk, NeliNo (Freelance), Remote

June 2023 - Present

Social media • Consulting • Programming things • International marketplace management • Company management • Analytics • FB Store promotion • Store based on Wordpress • Administration • Building customer
